

BOOM

An art blog with a soft spot for hand-made work by unknown people.

Booooooom features and showcases a wide range of fields including painting, animation, collage, designers, comics, documentaries, drawings, graffiti, illustration, fashion, installations, photography, music videos, typography, sculpture, magazines... and more!

The blog was launched in 2008 by Jeff Hamada, a Vancouver-based artist, with the hope that it would foster a community of people excited to go out and be creative. It has quickly become one of

the largest blogs on the web, with millions of pageviews each month, and readers from all over the world.

Highlighting emerging talents, and launching the careers of many young artists internationally, the site is a prominent voice in the new contemporary arts scene.

Want your work featured on Booooooom.com?

Every month there will be a submission post where anyone can share an image and a link to their website or blog. This is the best way to submit your work to be considered for a post on Booooooom. Everyone can browse, comment and up-vote work they like, and get their work out there. This really encourages artists in this community because it makes sure their work gets seen - these posts get a lot of traffic!

You can also share your work on our **Facebook** wall, **Google+** page, or through the submission link on the **Booooooom Tumblr**.
